

## **Periodicals Department Collections**

### **Periodicals Reference Collection**

The Periodicals Reference Collection includes print dictionaries, encyclopedias, handbooks and indexes. This collection is located in the first few shelves in the compact shelving area.

### **Periodicals Collection**

Periodicals are shelved by call number, starting with 'A' call numbers on the south end of the room and ending with 'Z' call numbers at the north end. The 1987 to current holdings are located on the open shelves on the west side (left) of the room. All current issues of these titles are located on the shelf beside the bound volumes. The 1986 and older holdings can be found in the compact shelving on the east side (right) of the room. All journals and magazines are included in the Library Catalog.

Materials included in this collection are designated by a 'PER' location in the Library Catalog.

### **Newspaper Collection**

Daily editions of the *Deseret News*, *New York Times*, *Provo Daily Herald*, *Salt Lake Tribune*, and *USA Today* are kept behind the Periodicals Reference Desk. Archives of the daily newspapers, as well as all other U.S. and foreign newspapers are kept in the Periodicals locked case. Please ask at the reference desk for assistance. Newspapers may be checked out for two hours; however, they must remain in the Periodicals Reading Room.

### **Locked Case**

Periodicals on CD-ROMs are located in the Periodicals Locked Case and must be requested at the Periodicals Reference Desk and used on a specially designated terminal.

### **Electronic Databases**

Electronic databases and periodical indexes may be accessed on the computers in the Periodicals Department. A variety of full text journals are available through these indexes, as well as through web sites listed in the BYU Library Catalog. For assistance with research in general topics, Librarian Assisted Research Services is available by appointment with the Periodicals Librarian (801-422-3666), or any of the available library staff.
